I just spoke with Demita and this is what I know:

- 1.) FT1001 is tentatively approved under profile LSE1142 they would like a sample sent with one of the trucks tomorrow so they can complete a final approval on this material.
- 2.) NT7 the water layer is approved at .45/gal the oil layer will be put into totes and shipped offsite accordingly the cost to do this is \$2.25 per gallon. Lonestar will run this material through their oil water separator, process the water and tote the oil. Is this acceptable??
- 3.) I have asked Demita to get with her lab pack specialist and see if they can come out to the site on Monday or Tuesday of next week to take a look at our lab samples and give us a price to T&D the package as a whole including packaging.
- 4.) Lonestar found an error on some of their manifests (ie they wrote their address wrong and their EPA ID Number). Lonestar is making the appropriate changes on their end and I have asked her to provide LeRoy with a package of all revised manifests so our records match.
- 5.) I'll keep you posted on the ST1,6 approval status tomorrow.

Call me on my cell tomorrow if we need to discuss anything.

Thanks,

Beth Crawford
